Configure OAuth2

Add the dependency:

```xml
<dependency>
    <groupId>org.springframework.boot</groupId>
    <artifactId>spring-boot-starter-oauth2-client</artifactId>
</dependency>
```

Configure the WebSecurityConfig

```java
.oauth2Login(oauth2Login ->
        oauth2Login
                .failureUrl("/login?error=true")
                .successHandler(oAuth2SuccessHandler)
)
```

Third Party Authentication
